World-Class Care for Patients of All Ages

When you choose Memorial Hermann-Texas Medical Center, part of the 12-hospital Memorial Hermann Health System, you’re selecting a facility consistently ranked among the top hospitals in the United States. For over a century, our staff and affiliated physicians have set new standards of care in Texas and the nation through revolutionary advances in medicine and surgery. Today, that legacy of achievement continues with research that leads to less-invasive procedures, quicker recovery times, improved patient outcomes, reduced medical costs and increased patient satisfaction.

Memorial Hermann-TMC is the primary teaching hospital for The University of Texas Health Science Center at Houston (UTHealth) Medical School. This collaboration gives our patients access to a team of accomplished specialists and subspecialists who practice leading-edge medicine, train future generations of physicians and are engaged in research that improves the way care is delivered.

Children’s Memorial Hermann Hospital

Each year, a multidisciplinary team of affiliated specialists and subspecialists from the staff of the UTHealth Medical School provides exceptional care in more than 120,000 patient visits from children, adolescents and the tiniest of premature infants. These affiliated physicians are leaders in providing diagnosis and clinical care in maternal-fetal medicine and neonatal intensive care services, as well as pediatric neuroscience, orthopedic and congenital heart services. We operate one of the nation’s largest neonatal intensive care units and one of only two Level IV NICUs in Southeast Texas, treating more than 1,000 neonates each year. The hospital benchmarks monthly against 18 other top member institutions of the National Association of Children’s Hospitals and Related Institutions (NACHRI), and for the fourth consecutive year, our mortality rate was better than the risk-adjusted NACHRI benchmark.

Memorial Hermann Heart & Vascular Institute

The Memorial Hermann Heart & Vascular Institute is the only freestanding heart hospital in the Texas Medical Center. Researchers and clinicians bringing groundbreaking discoveries from the laboratory to the bedside have made the Institute one of the world’s leading cardiovascular hospitals. Thanks to their expertise and dedication, the Institute is known for a solid track record of innovation, outstanding outcomes and exceptional patient care, and is consistently ranked by national quality benchmarking organizations as a leader in clinical quality and patient safety. Affiliated physician teams provide comprehensive care for arrhythmias, coronary artery disease, aortic aneurysm, peripheral vascular disease, structural and valvular heart disease, esophageal and pulmonary disorders, and advanced heart failure including total artificial heart placement and heart transplantation.
Mischer Neuroscience Institute

Mischer Neuroscience Institute brings together a team of nationally and internationally recognized clinicians, researchers and educators whose insights and research findings are transforming the field of neuroscience. Patients come to the Institute from around the world seeking treatment for both rare and common diseases of the brain and spine. More than 6,400 procedures are performed in the surgical neuroscience suites annually, and as a Primary Stroke Center, the Institute is a national leader in stroke treatment. It also offers the largest and most comprehensive neuroscience program in Texas, including centers of excellence for the treatment of brain tumor, cerebrovascular disease, children’s neuroscience, epilepsy, movement disorders and neurodegenerative diseases, neurocognitive disorders, multiple sclerosis, neuromuscular diseases, spine, neurotrauma/critical care and neurorehabilitation.

Texas Trauma Institute

As one of the busiest Level I trauma centers in the nation and part of the only hospital in Houston with Burn Center Verification through the American Burn Association, the Texas Trauma Institute brings together a superior team of clinicians, researchers and educators to treat the most complex adult and pediatric trauma cases. The Institute is also home to Memorial Hermann Life Flight®, which flies more than 3,000 missions each year. Accredited by the Commission on Accreditation of Medical Transport Systems, Life Flight operates helicopters within a 150-mile radius of the Texas Medical Center and uses airplane transport worldwide.

The Ironman Sports Medicine Institute and Orthopedics Services

With affiliated specialists in spine, shoulder, elbow, hip, knee, foot and ankle conditions and total joint replacement, our sports medicine and orthopedics program is one of the most comprehensive in the region. The cornerstone of the program is the Ironman Sports Medicine Institute, where physicians and staff help athletes at all levels – recreational, competitive or professional – stay in the game and achieve a higher level of performance.

Ertan Digestive Disease Center

The Ertan Digestive Disease Center provides comprehensive medical and surgical treatment for patients with diseases of the esophagus, stomach, intestine, pancreas, biliary tract and liver. Physicians affiliated with the Center treat a broad range of conditions, including gastroesophageal reflux disorders, especially Barrett’s metaplasia and dysplasia; inflammatory bowel diseases including Crohn’s disease, chronic ulcerative colitis and other colitides; peptic ulcers and hypergastrinemic conditions; gastrointestinal and liver cancers; chronic and acute liver disease; and biliary-pancreatic disorders. Through the Center, patients have access to various advanced GI endoscopic therapeutic modalities in a tertiary care setting. Under the care of affiliated physicians, patients receive innovative and effective gastroenterology treatments. The goal is to provide excellence in clinical care and research, delivering outstanding gastroenterology treatments.

Memorial Hermann Cancer Center

The new Memorial Hermann Cancer Center-Texas Medical Center is built on years of experience and extensive knowledge in helping thousands of cancer patients in Houston find hope and healing. Treatment teams at the Center put patients first and support them with physician expertise, advanced treatments and gifted caregivers. In their expanded treatment facilities, they offer a full array of multidisciplinary services, including surgery, chemotherapy, radiation therapy, nutritional counseling, laboratory services and pain management. A team of nationally recognized oncologists and researchers offers access to the latest procedures and clinical trials, working together to develop new and successful treatments to improve cancer survival rates and quality of life. They are proud to be leaders in providing very personalized, research-driven, evidence-based care to patients in a comforting environment.

Specialty Surgery Services

Memorial Hermann-TMC provides a complete range of surgical services, including ambulatory and minimally invasive surgery, using procedures associated with less pain and scarring and faster recovery. Our comprehensive programs include bariatrics; ear, nose and throat; urology; gynecology; general surgery; ophthalmology; and plastic surgery. The Memorial Hermann-TMC Campus is also home to the Memorial Hermann Surgical Innovation & Robotics Institute, one of the largest sites for robotic surgery and training in the nation.
Transplant Services

The groundbreaking achievements of hospital-affiliated transplant surgeons include the first liver transplant in Houston and the first pancreas transplant in Texas. Today, we maintain our leadership role through the multidisciplinary Transplant Center specializing in adult and pediatric transplants of the kidneys, liver and pancreas. A patient-centered care philosophy ensures proactive assessment, treatment and follow-up protocols, as well as education and support for patients and their families.

Women’s Services

Caring for women of all ages has always been a priority at Memorial Hermann-TMC. Here, affiliated physicians take a patient-centered approach to delivering advanced heart, bone and breast care, as well as state-of-the-art gynecological and maternity care. Women’s Services offers a comprehensive program of the finest gynecology, obstetric and neonatal services available today, including fertility services, urogynecology, high-risk pregnancy, labor and delivery, menopause care, pelvic floor health and neonatal intensive care.

TIRR Memorial Hermann

A national leader in medical rehabilitation and research, TIRR Memorial Hermann is a model for interdisciplinary rehabilitation services, patient care, education and research. The hospital has more than 50 years of experience in rehabilitation and research and is one of only 16 in the nation designated as a model system by the National Institute on Disability and Rehabilitation Research (NIDRR) for its traumatic brain injury program. For 23 consecutive years, U.S. News & World Report has named the hospital to its list of “America’s Best Hospitals.” In 2012, TIRR Memorial Hermann ranked third in the nation.
