Data Selection and Comparison Sliding Scale Criteria

FY2016-2017

7-step Selection Criteria

- Align with Strategies/ADVANCE
  See PDM – Integration Step 1
- Meaningful & Actionable
  Data needs to tie into a process or outcome
- Sound Comparison/Benchmarks
  See PDM – Approach Step 12
- Collectible and accessible
  See Comparison Criteria
- Reportable & Segmentable
  Data needs to be able to be refreshed in a timely fashion with proper segmentation
- Clear & Easy to Understand
  Data needs to be able to be shared with stakeholders clearly
- Have Owners with Accountability
  See PDM – Approach Step 2

Sliding Scale

- National
  - Available
    - Yes
  - No
    - Regional
      - Yes
    - Local
      - Yes
  - MHHS
    - Yes
  - Historical
    - Yes

Need a Comparison for MHSL Metric

- Available
  - Yes
- No
  - Accessible
    - Yes
    - Make a data driven assumption based on available sites, literature, trends and/or MHHS reports
  - No
  - Relevant
    - Yes
    - Available but out of reach, i.e. not peer reviewed, use above assumption method
    - No
    - Affordable
      - Yes
      - Comparison is available and accessible, but not a relevant match, i.e. population or process mismatch
      - No
      - Adopted
        - Yes

NOTE

The absence of a comparison is an opportunity for MHSL to lead the way and set a standard for innovation and to Advance health.
