Health Screenings, Through the Years

Convenient Preventive Care

At Memorial Hermann, we get it. You lead a busy life, and finding time to see the doctor isn't always easy. We also know that preventive care is an important part of living a long and healthy life. That's why we are here for you with a full range of convenient ways to take charge of your health. Our early detection and screening guide gives you important information to help you stay healthy during each stage of life.

“I feel fine. Why should I see a doctor?”

Sometimes we don't put health and wellness at the top of the priority list. While it can be tempting to put it off, seeing your healthcare provider for regular health screenings is an important part of staying well. Early detection is one of the best defenses against illness. Health screenings can help you and your provider identify health problems early, when treatments may be more successful.

Get the care you need, when and where you need it.

Our enclosed screening guide gives you the information you need to keep track of your preventive care and stay healthy. With Memorial Hermann's network of convenient locations and virtual options, we make it easy to get the screenings you need, so you can get back to what matters most. Talk with your healthcare provider about which screenings are appropriate for you.

Get started by finding a provider.

Find a Memorial Hermann-affiliated provider in your area to get the care you need—from primary care physicians to specialists, as well as outpatient imaging and physical therapy. To explore available providers at your convenience, go online to [memorialhermann.org](https://www.memorialhermann.org) or call **713.222.CARE (2273)**.

Stay connected to your health with Everyday Well.

Take advantage of the many features that Everyday Well offers, to help keep you informed about your care. Go online to [memorialhermann.com/everydaywell](https://www.memorialhermann.com/everydaywell) and download the app today.
